DETAILED ACTION

Claims 1-37 are pending in this application.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, 30-34 and 37, drawn to a tablet made by direct compression, classified in class 424, subclass 464.
- II. Claims 1-19, 26-29 and 35-37, drawn to a tablet made by granulation process, classified in class 424, subclass 464.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the two groups are drawn to the production of tablets via two different methods (1) direct compression and (2) granulation process. These two methods are distinct in the manner in which they produce tablets for example the direct compression process involves a "dry blend" of ingredients mixed and milled together and pressed into tablets, whereas in the granulation process the ingredients are blended together with an aqueous solution, dried and pressed into tablets. It is the position of the examiner that these two different process as patentably distinct and a restriction requirement is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. Joseph Synder to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
